

Mrs Nester's Home Learning Weekly Challenge: 6th April 2020

I hope that you enjoyed the challenge for last week and that you have got lots of rainbow pictures decorating your house. This week I thought it would be fun to continue to look to the sky to think about stars. I know that lots of you will be being stars at home and getting on with your home learning for your families. Keep listening and learning and remember, when it rains look for rainbows, when it feels dark look for stars.

1. Can you make use a basic biscuit mix to make some yummy shortbread. You will only need sugar, butter and plain flour for the mixture. Research on line to see if you can find your own recipe and cut the batter into stars before you cook it.

2. Learn the song twinkle, twinkle little star. Try and make up a new song to the tune. Be as creative as you can!

3. Design a rocket that will take you on an amazing adventure through the stars and on to a new planet. What will you discover?

4. Look to the stars. How many can you count before you lose count? Can you spot any stars that are shooting or brighter than any other stars?

5. Can you make a star mobile to hang in your bedroom window? If you can add some planets and rockets to it too.
