

How to build a snowman.

What you need:

Warm clothes,

lots of snow,

a carrot,

some stones

and an old scarf.

What to do:

First, put on lots of warm clothes and don't forget our gloves.

Next, make a ball of snow and roll it around to make a huge body.

After that, make another slightly smaller snowball for the head.

Now, place the head on top of the body.

Then, use the stones to make some eyes and a mouth.

After that, press the carrot into the head to make a nose.

Finally, wrap the scarf around the snowman to keep him warm!

Enjoy your snowman!
